

DISCOVER MARK II

EXUS EVOLUTION

EXUS LENS PROTECT Mark II

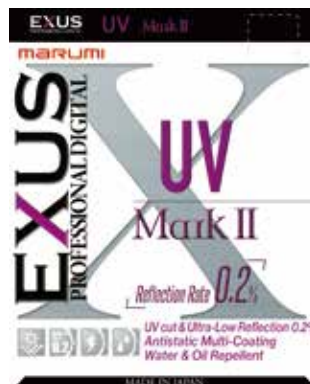

Static-resistant
Water-/Oil-repellent

Features all the essential functionalities required for a high-end lens protection, such as water and oil repellency including fingerprint, dust-free, and scratch resistancy.

EXUS UV Mark II

Sharp Cut UV
Static-resistant
Water-/Oil-repellent

By adopting Corning® UV Clear Glass, this filter effectively blocks harmful ultraviolet light below 410nm, helping to maintain image contrast and sharpness while minimizing haze and bluish color cast.

EXUS CIRCULAR P.L Mark II

High-Transmittance
Static-resistant
Water-/Oil-repellent

With an impressive 1.2-stop equivalent, 45% high light transmittance, this polarizer allows more light to reach the sensor for brighter images, while ensuring dust-free, water- and oil-repellent performance, suppressing reflections, and enhancing color contrast.

Enhanced Low-Reflectance

By adopting a new coating, reflectance has been improved to just 0.2%, which significantly reduces flare and ghosting.

MADE IN JAPAN

Neutral Color Polarizer

By adopting a new polarizing film, color neutrality has been enhanced, which faithfully reproduces the original color.

MADE IN JAPAN

EXUS CIRCULAR P.L EXUS Mark II

List of Specification Icon

Optical Glass

- High Flatness and Strength realizes despite its ultra-thin frame design.
- Blackened Outer Rim minimizes internal reflection to reduce flare and ghosting.
- UV cut blocks ultraviolet rays.

Neutral Color Polarizer maintains original color fidelity.

High Transmission Polarizer brighter than conventional one, suits to leave the filter permanently attached.

Coating

- Static Resistant Coating prevents dust adhesion while also providing anti-reflection.
- Scratch Resistant Coating avoids scratches on the glass surface.
- Water Repellent Coating repels water droplets on the glass surface.
- Oil Repellent Coating prevents various stains, including fingerprints.

Frame Structure

- Satin Finish reduces reflection.
- Lens Cap and Hood Attachable with filters on the lenses*
- Knurling design for easier handling.
